

Comments from patients referred to Impact by GPs at Radford Medical Practice

Treatment has made a massive difference to my back pain. The severity of the pain has disappeared. Feel almost cured!

The treatment has been brilliant. The pain in my back was really severe and has been changed to very mild pain after treatment. I think a few more treatments could eliminate the pain altogether. Overall, brilliant results, life changing, very satisfied with the results.

The homeopathy, and yourself, proved helpful and I feel more settled now.

Deep down, I feel a bit more steady and solid. I don't feel so tired, not dragging through the day. I was depressed, but I'm not now.

I do not need physio from work any more.

Generally sleeping more after a bad stretch, more energy than expected at times, some periods of extreme pain but generally able to cope, sometimes without medication.

At the start of treatment, anti-inflammatories and pain killers every day x 3 – now anti-inflammatories only once a week, if that, and painkillers once a week or less, depending on work load.

I visited my GP twice with back problems – I have not been since [treatment].

I stopped having facet joint injections for back pain as I was not having positive results – the chiropractor has helped significantly.

Did make me think more about my general health in relation to headache e.g. links to body – back pain, diet, exercise etc. Thank you.

Very happy with the service provided. It has changed my life for the better”.

I received effective and positive treatment. Thank you!

If I could continue treatment I would do so. But the medical practice only allows 6 sessions which isn't enough.
